

Direct Access Update and Insurance FAQs:

Did you know that in the State of Georgia, you obtain physical therapy services without a physician referral? You're allowed 8 visits or 21 days (~ 3 weeks) of treatment.

Most major insurance plans do not require a referral to start physical therapy. Requiring a referral from a physician is state law AND can be required by some insurance plans, and those requirements vary by state.

How do you know what your insurance plan requires and what are your benefits? Our team verifies benefits to determine physical therapy coverage, limitations and requirements. We encourage our patients to verify their benefits, too.

What happens after 8 visits or 21 days? If you and your therapist decide you need treatment beyond this timeframe, you will need a referral or script from a physician (primary care, orthopedic, internal medicine, etc.) to continue treatment. Please note: modalities such as dry needling cannot be provided without a physician referral AND only by a physical therapist who is certified in dry needling.

Can I get a referral before the 8 visits or 21-day expiration date? Absolutely! Your therapist and our team will update you on your progress and discuss further treatment before your visits/time expires.

What if I do not have insurance and want to pay cash? We have a cash plan available for those who are uninsured or underinsured. Cash patients are also subject to the direct access requirements.

What is your list of in and out of network insurance plans?

IN NETWORK:
